AI operator evaluation

How do YOU use AI?

Four degrees of leverage · find where you fit

The cascade	World user* Modeled baseline	Our field Typical operator · median	Ever wondered how you use AI vs. someone else? Find your rank ↗	Power users Top 100 · median	SignalAF · metric highs OITL Operator in the loop	SignalAF · metric highs Auto† Autonomous / review
Yield	1.75	1.90	?	239.61	590.82	64.33M
Signal-to-noise	0.33	0.09	?	0.51	0.6	1
Velocity	0.50	0.10	?	1.04	1.53	495.04
Leverage	3.5×	20.3×	?	241.6×	385.99×	129.95K×
10xDEV	0.54	1.31	?	2.38	2.59	5.11
Efficiency	1.00	5.25	?	62.83	101.8	33.22K
Operating ratio	3.5 : 1 : 0.50	20 : 1 : 0.10	?	242 : 1 : 1.04	385.99 : 1 : 1.53	129.95K : 1 : 495.04

*World: AA modeled reference, not a measured global average. Field & power: qualifying medians, outliers excluded. OITL/Auto: per-metric highs; operating ratio uses each Yield leader.

†Auto includes unresolved review candidates, not verified autonomy. Hybrid overlaps both groups. — = unavailable. Values captured at render.
